Career Objective

Full-stack software engineer with expertise in React, Node.js, Express.js, and PostgreSQL, focused on building scalable, high-performance web applications. Experienced in API design, database query optimization, and system architecture, backed by a strong command of data structures and algorithms. Passionate about writing clean, maintainable code and delivering software that scales reliably in production.

Academic Details

• Pranveer Singh Institute of Technology Bachelor of Technology in Computer Science and Engineering [Percentage till semester 6: 72.58]	Kanpur 2023 - Present
• Radha Krishna Memorial Education Centre Senior Secondary Education [Percentage: 74.4]	Kanpur 2022
• Radha Krishna Memorial Education Centre Secondary Education [Percentage: 85]	Kanpur 2020

Technical Skills

- **Languages:** C++, JavaScript, TypeScript
- **Frontend Technologies:** React, Nextjs, Tailwind CSS
- **Backend Technologies:** Nodejs, Expressjs, REST APIs
- **Databases & ORM:** PostgreSQL, Prisma, MongoDB
- **Authentication:** NextAuth, OAuth, JWT
- **Tools & DevOps:** Git, GitHub, Docker, Postman, Vercel
- **Concepts:** Data Structures & Algorithms, Performance Optimization, Scalability

Projects

Consoled - Terminal UI Component Library	(Ongoing)
• Technologies: Go, ANSI Escape Codes, Event Systems, Layout Engines	
• Description:	
◦ Engineered a custom component-based terminal UI framework in Go, implementing React-style declarative composition and a hooks-like state management API for CLI applications.	
◦ Built a concurrent event loop using goroutines and channels to handle async input and screen re-renders without UI blocking .	
IntervueX - Mock-Interview Platform	(Completed)
• Technologies: React, TypeScript, Nodejs, PostgreSQL, Prisma, Tailwind CSS, Monaco Editor, GetStream, Clerk	
• Description:	
◦ Engineered a high-performance, real-time interview platform using GetStream , delivering a low-latency collaborative coding environment.	
◦ Integrated Monaco Editor with in-browser code execution and evaluation to provide a seamless, IDE-like user experience.	
◦ Designed an optimized PostgreSQL schema using Prisma for real-time data synchronization, secured by a robust Clerk authentication system .	
Reviewboxd - Media Progress Tracking Platform	(Completed)
• Technologies: Nextjs, TypeScript, Nodejs, PostgreSQL, Prisma, Tailwind CSS, NextAuth	
• Description:	
◦ Engineered a regional proxy server deployed abroad to bypass geographic API restrictions, ensuring reliable metadata fetching from TMDB .	
◦ Designed a normalized 6-table PostgreSQL schema with strategic indexing , reducing query latency from 400ms to under 50ms .	
◦ Shipped an SSR-optimized Next.js frontend with Google OAuth, cutting initial page load from 4.2s to 1.1s .	

Coding Achievements

- Solved **1000+ algorithmic problems** across LeetCode, Codeforces, and CodeChef
- Among **top 13%** coders in **LeetCode** [Max Rating: **1702**]
- **2-Star** coder in **CodeChef** [Max Rating: **1403**]
- Max Rating of **919** in **Codeforces**
